

Industrial Automation Engineering & Capital Equipment

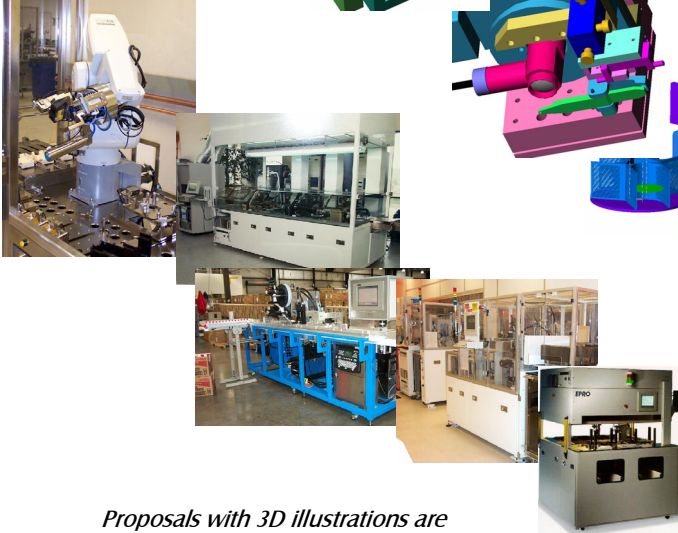

Design & Build Solutions for Factories

We provide factory automation engineering and capital equipment for material handling, test and processing applications. Our staff uses high-tech tools and products, plus a vast and extensive industry experience. We build, install and support production-validated machinery in the SF Bay Area and all over the World.

Automation Contracting

- Concept Creation, with Formal Machine Specifications
- Fixed Price Development
- Formal Engineering Process, with Reviews
- Assembly & Build of Production Quality Machine
- Software, Debug, Install & Qualification
- Service, Documentation, Spares

Serving Manufacturing Industries

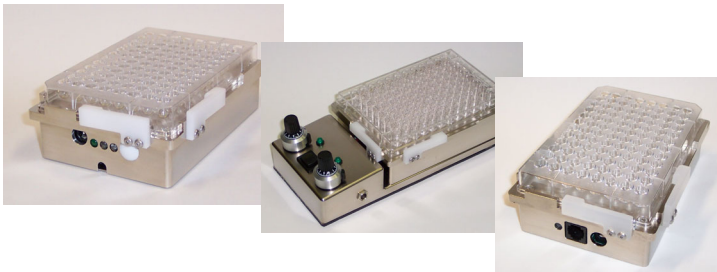

- Biotechnology, Drug Discovery, Genomics and Proteomics
- Foods & Packaging
- Fiber & Optics Manufacturing
- Semiconductor Back-End Automation
- Hard Disk Media & Drives
- Clean Room, cGMP, Aseptic Designs

Proposals with 3D illustrations are always free! Call or email 24/7 to talk with an Applications Engineer. Let us provide you a quote on your next project!

Full Range of Project Sizes

- Simple Fixturing Projects
- Test Stands
- Assembly Systems
- Processing Workstations
- Gantry & Robotic Workcells
- VB, C and PLC Machinery Programming

Microplate Orbital Shakers

Microplate Orbital Shaker Product Series for Biotechnology, Proteomics, Genomics and Bio-Robotics. Includes RS-232 data controlled model and manual lab model.
